 RNAV - STANDARD  
 INSTRUMENT APPROACH PROCEDURE - TITLE 14 CFR PART 97.33

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HATH, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.

**TERMINAL ROUTES, (CONT.):**

| FROM    | TO         | COURSE AND DISTANCE | ALTITUDE |
|---------|------------|---------------------|----------|
| 500 MSL | UVNOQ (FB) |                     |          |
| UVNOQ   | CABEX (FO) | 290.61 / 18.87      | 6000     |

## NOTES, (CONT.):

ALL MDA 60 FT AND VISIBILITY LP AND LNAV CATS C AND D 1/4 MILE.

CHART NOTE: RWY 2 HELICOPTER VISIBILITY REDUCTION BELOW 3/4 SM NOT AUTHORIZED.

CHART PROFILE NOTE: VGS1 AND DESCENT ANGLES NOT COINCIDENT (VGS1 ANGLE {ANGLE}/TCH {FEET})

**Federal Aviation Administration**

**14 CFR Part 97**

[Docket No. [31082](#); Amdt. No. [3701](#)]

**Standard Instrument Approach Procedures, and Takeoff Minimums  
and Obstacle Departure Procedures; Miscellaneous Amendments**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This rule establishes, amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

**DATES:** This rule is effective [INSERT DATE OF PUBLICATION IN THE FEDERAL REGISTER]. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications

listed in the regulations is approved by the Director of the Federal Register as of [INSERT DATE OF PUBLICATION IN THE FEDERAL REGISTER].

**ADDRESSES:** Availability of matters incorporated by reference in the amendment is as follows:

**For Examination**

1. U.S. Department of Transportation, Docket Ops-M30, 1200 New Jersey Avenue SE, West Bldg., Ground Floor, Washington, D.C., 20590-0001.

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Navigation Products, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to:

**Availability**

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at [nfdc.faa.gov](http://nfdc.faa.gov) to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

**FOR FURTHER INFORMATION CONTACT:** Thomas J. Nichols, Flight Procedure Standards Branch (AFS-420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd. Oklahoma City, OK. 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) Telephone: (405) 954-4164.

**SUPPLEMENTARY INFORMATION:**

This rule amends Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), by establishing, amending, suspending, or removes SIAPS, Takeoff Minimums and/or ODPS. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part §97.20. The applicable FAA forms are FAA Forms 8260-3, 8260-4, 8260-5, 8260-15A, and 8260-15B when required by an entry on 8260-15A.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each

SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

### **Availability and Summary of Material Incorporated by Reference**

The material incorporated by reference is publicly available as listed in the ADDRESSES section.

The material incorporated by reference describes SIAPS, Takeoff Minimums and/or ODPS as identified in the amendatory language for part 97 of this final rule.

### **The Rule**

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as Amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore--(1) is not a "significant regulatory action" under Executive Order 12866;(2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26,1979) ; and (3)does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR part 97:**

Air Traffic Control, Airports, Incorporation by reference,  
Navigation (Air).

Issued in Washington, DC on [JUNE 17, 2016](#)

A handwritten signature in black ink, appearing to read "John S. Duncan", with a long horizontal flourish extending to the right.

John S. Duncan  
Director, Flight Standards Service

**ADOPTION OF THE AMENDMENT**

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

**Part 97—Standard Instrument Approach Procedures**

1. The authority citation for part 97 continues to read as follows:

AUTHORITY: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721-44722.

2. Part 97 is amended to read as follows:

**COORDINATED WITH:**

ALPA, AOPA, NBAA, AMGR, ZDV

**CHANGES:**

1. REMOVED TAKEOFF MINIMUMS OF 300-1 FROM RWY 15, INCREASED CLIMB GRADIENT FROM 252 FT/NM TO 285 FT/NM AND INCREASED CLIMB-TO ALTITUDE FROM 6000 TO 6200.
2. CHANGED MINIMUMS FOR CLIMB IN VISUAL CONDITIONS FROM 1900-3 TO 3100-3.
3. CHANGED VCOA CLIMB TO ALTITUDE FROM 6100 TO 7300.
4. REMOVED EXCESSIVE LIST OF CONTROLLING OBSTACLES.
5. REMOVED OLD RWY 15 TAKEOFF OBSTACLES AND ADDED NEW LOW-CLOSE-IN OBSTACLE.
6. CHANGED INITIAL CLIMB HEADINGS ON DEPARTURE PROCEDURES TO REFLECT RUNWAY HEADINGS.

**REASONS:**

1. OBSTACLE CAUSING TAKEOFF MINIMUMS IS BEYOND 3 SM AND HAS 5E ACCURACY CODE REQUIRING AC ADJUSTMENT WHICH RAISED CLIMB GRADIENT. THE INCREASED CLIMB-TO ALTITUDE ENSURES AIRCRAFT CROSS PGA AT OR ABOVE 7700.
2. EVALUATION IDENTIFIED NEW CONTROLLING OBSTACLE.
3. EVALUATION IDENTIFIED NEW CONTROLLING OBSTACLE.
4. DATABASE MODIFICATION AND EVALUATION IDENTIFIED OBSTACLES WERE NOT CONTROLLING OBSTACLES.
5. DATABASE MODIFICATION.
6. INITIAL CLIMB HEADINGS DID NOT REFLECT RUNWAY HEADINGS.

**RNAV - STANDARD  
INSTRUMENT APPROACH PROCEDURE - TITLE 14 CFR PART 97.33**

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.

## TERMINAL ROUTES, (CONT.):

| FROM       | TO         | COURSE AND DISTANCE | ALTITUDE |
|------------|------------|---------------------|----------|
| RW12 (MAP) | 700 MSL    | 121.98              | 700      |
| 700 MSL    | KITBY (FO) |                     | 2000     |

## NOTES, (CONT.):

CHART PLANVIEW NOTE: PROCEDURE NA FOR ARRIVALS AT BLEAR ON V230-585 NORTHEAST BOUND.

CHART NOTE: BARO-VNAV NA WHEN USING FRESNO YOSEMITE INTL ALTIMETER SETTING.

CHART NOTE: WHEN LOCAL ALTIMETER SETTING NOT RECEIVED, USE FRESNO YOSEMITE INTL ALTIMETER SETTING AND INCREASE ALL DA 64 FEET AND ALL VISIBILITY 1/4 MILE; INCREASE ALL MDA 80 FEET AND ALL VISIBILITY 1/4 MILE.

CHART NOTE: VDP NA WHEN USING FRESNO YOSEMITE INTL ALTIMETER SETTING.

US DEPARTMENT OF TRANSPORTATION - FEDERAL AVIATION ADMINISTRATION  
RNAV - STANDARD  
INSTRUMENT APPROACH PROCEDURE - TITLE 14 CFR PART 97.33

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.

TERMINAL ROUTES, (CONT.):

| FROM                  | TO              | COURSE AND DISTANCE | ALTITUDE |
|-----------------------|-----------------|---------------------|----------|
| KNOSP/1.80 NM TO RW30 | RW30 (MAP) (FO) | 302.08 / 1.80       |          |
| RW30 (MAP)            | 700 MSL         | 302.08              | 700      |
| 700 MSL               | KITBY (FO)      |                     | 2000     |

NOTES, (CONT.):

CHART NOTE: WHEN LOCAL ALTIMETER SETTING NOT RECEIVED, USE FRESNO YOSEMITE INTL ALTIMETER SETTING AND INCREASE ALL DA 64 FEET AND ALL VISIBILITY 1/4 MILE; INCREASE ALL MDA 80 FEET AND ALL VISIBILITY 1/4 MILE.

CHART NOTE: VDP NA WHEN USING FRESNO YOSEMITE INTL ALTIMETER SETTING.

## NOTES, (CONT.):

CHART NOTE: \*\* MISSED APPROACH REQUIRES MINIMUM CLIMB OF 325 FEET PER NM TO 2100.

CHART NOTE: CIRCLING NA TO RWYS 10L, 10R, 19L, AND 19R.

CHART NOTE: CIRCLING RWY 1L, 1R NA AT NIGHT.

**\*\*SA CAT II ILS SPECIAL AIRCREW AND AIRCRAFT CERTIFICATION REQUIRED: S-ILS 28L: CAT A, B, C, D,**

RA 100, RVR 1200, HAT 100, DA 113 MSL.

CHART NOTE SIMULTANEOUS APPROACH AUTHORIZED WITH ILS OR LOC RWY 28R.

CHART PROFILE NOTE: USE I-SFO DME WHEN ON THE LOCALIZER COURSE.

CHART NOTE SIMULTANEOUS OPERATIONS REQUIRE USE OF VERTICAL GUIDANCE; MAINTAIN LAST ASSIGNED ALTITUDE UNTIL ESTABLISHED ON GLIDESLOPE.

CHART NOTE: % FOR INOPERATIVE MALSR INCREASE S-LOC CAT C AND D VISIBILITY TO 2 MILE.

SA CAT II CHART NOTE: REDUCED LIGHTING: REQUIRES SPECIFIC OPSPEC, MSPEC, OR LOA APPROVAL AND USE OF AUTOLAND OR HUD TO TOUCHDOWN.

CHART NOTE: LOC PROCEDURE NA DURING SIMULTANEOUS OPERATIONS.

CHART PLANVIEW NOTE ADJACENT TO ARCHI: GPS REQUIRED.

CHART PLANVIEW NOTE ADJACENT TO MENLO: GPS REQUIRED.

CHART SPEED ICON IN PLANVIEW AT ARCHI: MAX 230 KIAS.

CHART SPEED ICON IN PLANVIEW AT MENLO: MAX 230 KIAS.

Elevations and altitudes are in feet, MSL, except HAT , HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR. |                                                                                                     |                   |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                       |                        |                        |                  |                                                                                                            |            |            |       |             |                                          |                | Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR. |                                       |                            |                                                                 |            |             |             |       |     |            |            |       |             |               |                |                                    |                                       |                            |       |     |       |    |    |  |  |  |  |  |  |  |          |        |     |       |     |       |    |    |  |  |  |  |  |  |  |          |  |   |       |     |       |    |    |  |  |  |  |  |  |  |          |  |   |       |     |       |    |    |  |  |  |  |  |  |  |          |  |   |       |     |       |    |    |  |       |      |  |  |  |  |          |  |      |       |     |       |    |    |  |  |  |  |  |  |  |  |  |     |       |     |       |    |    |  |       |      |  |  |  |  |          |  |      |       |     |       |    |    |  |  |  |  |  |  |  |          |        |     |       |     |       |    |    |  |       |     |  |  |  |  |          |  |   |       |     |       |    |    |  |       |      |  |  |  |  |          |  |      |  |     |       |    |    |  |  |      |  |  |  |  |          |  |     |  |     |       |    |    |  |       |      |  |  |     |  |          |  |     |  |     |       |    |    |  |       |      |      |  |  |  |          |  |      |  |     |       |    |    |  |       |     |  |  |  |  |          |  |     |  |     |       |    |    |  |       |  |  |   |  |  |          |  |    |            |          |           |     |            |             |     |            |             |            |            |             |       |            |             |       |            |             |       |            |             |       |            |             |       |            |             |       |            |             |       |            |             |       |            |             |            |            |             |        |                       |                        |                        |                  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

**RNAV STANDARD INSTRUMENT APPROACH PROCEDURE  
FLIGHT STANDARDS SERVICE - FAR PART 97.33**

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.

**RNAV STANDARD INSTRUMENT APPROACH PROCEDURE  
FLIGHT STANDARDS SERVICE - FAR PART 97.33**

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.

US DEPARTMENT OF TRANSPORTATION - FEDERAL AVIATION ADMINISTRATION  
ILS - STANDARD  
INSTRUMENT APPROACH PROCEDURE - TITLE 14 CFR PART 97.29

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.

NOTES, (CONT.):

\*LOC ONLY

CHART NOTE: FOR INOPERATIVE MALSR, INCREASE S-LOC 12R CAT C/D VISIBILITY TO 1 MILE.

**ILS - STANDARD  
INSTRUMENT APPROACH PROCEDURE - TITLE 14 CFR PART 97.29**

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.

**NOTES, (CONT.):**

CHART NOTE: \*\*RVR 1800 AUTHORIZED WITH USE OF FD OR AP OR HUD TO DA.

CHART NOTE: DME REQUIRED.

CHART PROFILE NOTE: VGSI AND ILS GLIDEPATH NOT COINCIDENT (VGSI ANGLE {ANGLE}/TCH {FEET}).

CHART SPEED ICON IN PLANVIEW AT KLIDE: AT 230 KIAS.

SA CAT I CHART NOTE: REQUIRES SPECIFIC OPSPEC, MSPEC, OR LOA APPROVAL AND USE OF HUD TO DH.

SA CAT II CHART NOTE: REDUCED LIGHTING: REQUIRES SPECIFIC OPSPEC, MSPEC, OR LOA APPROVAL AND USE OF AUTOLAND OR HUD TO TOUCHDOWN.

SA CAT III CHART NOTE: NOT AUTHORIZED WHEN TOWER CLOSED.

**RNAV STANDARD INSTRUMENT APPROACH PROCEDURE  
FLIGHT STANDARDS SERVICE - FAR PART 97.33**

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.

**RNAV - STANDARD**  
**INSTRUMENT APPROACH PROCEDURE - TITLE 14 CFR PART 97.33**

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.

NOTES, (CONT.):

CHART NOTE: FOR INOPERATIVE MALSR, INCREASE LNAV/VNAV ALL CATS VISIBILITY TO 1 MILE AND LNAV CATS C/D VISIBILITY TO 1 3/8 MILE.

**RNAV STANDARD INSTRUMENT APPROACH PROCEDURE  
FLIGHT STANDARDS SERVICE - FAR PART 97.33**

Bearings, headings, courses, and radials are magnetic. Elevations and altitudes are in feet, MSL, except HAT, HAA, TCH, and RA. Altitudes are minimum altitudes unless otherwise indicated. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles or in feet RVR.
